HOSPITAL POLICY HANDBOOK

Sample training document for learning Document Ingestion, Chunking, Embeddings and RAG

Document ID: HSP-POL-001 **Version:** 1.0 **Effective date:** 1 January 2026

Important: This is a fictional sample document created for educational and software-testing purposes. It is not a real hospital policy and must not be used to make actual medical, billing or operational decisions.

1. Patient Registration Policy

• All new patients must complete the registration process before receiving a non-emergency consultation.

• During registration, patients should provide their full name, date of birth, contact number and current residential address. Patients may also be asked to provide a valid identity document where required by the hospital.

• Returning patients should confirm that their contact details are current. If any information has changed, the registration record should be updated.

• Emergency patients must receive prompt emergency assessment. Administrative registration requirements must not delay emergency care.

2. Appointment Booking Policy

• Appointments may be requested through the hospital reception desk, telephone service or approved online booking portal.

• Patients should provide their name, contact number, preferred department, preferred doctor (if known) and requested appointment date.

• An appointment is considered confirmed only after the patient receives a confirmation message or reference number.

• Patients should arrive 15 minutes before their scheduled appointment to allow time for check-in. Late arrival may require rescheduling depending on doctor availability.

3. Appointment Cancellation and Rescheduling Policy

• Patients may cancel an appointment up to 24 hours before the scheduled appointment time.

• Cancellations made less than 24 hours before the scheduled appointment may be subject to a cancellation charge, depending on the applicable hospital fee schedule.

• Patients who need to reschedule should contact the hospital reception or use the approved booking portal. A new appointment is subject to slot availability.

• If the hospital cancels an appointment, staff should notify the patient and offer available alternative appointment slots.

• Cancellation requests should be recorded with the request date, appointment reference number and cancellation status.

4. Consultation and Waiting Policy

• Patients should check in at reception after arriving at the hospital.

• Patients are generally attended to according to their appointment time and clinical priority. Emergency cases may be prioritized regardless of appointment order.

• Estimated waiting times are informational and may change due to emergency cases, consultation duration or doctor availability.

• Patients who leave the premises while waiting should inform reception.

5. Billing and Payment Policy

• Consultation charges and other applicable fees should be communicated to patients before payment whenever reasonably possible.

• Payments may be made using payment methods currently supported by the hospital. Availability of a payment method should be confirmed with the billing desk.

• Patients should retain the payment receipt for their records.

• Refund eligibility and processing timelines depend on the service provided and the applicable hospital refund rules. Patients should contact the billing desk for a review of a specific request.

6. Medical Records and Privacy Policy

• Patient information and medical records must be accessed only by authorized personnel for legitimate care, administrative or legal purposes.

• Staff must not share patient information with unauthorized individuals.

• Requests for copies of medical records must be submitted through the hospital's designated records process. Identity and authorization may need to be verified before records are released.

• Printed records containing personal information should be stored securely and disposed of using an approved confidential disposal process.

7. Visitor Policy

• Visitors must follow the instructions provided by hospital staff and observe any department-specific visitor restrictions.

• Visitors should maintain a quiet environment and avoid disturbing patients or clinical activities.

• Children visiting patient-care areas must be accompanied by a responsible adult.

• Visitor access may be temporarily restricted for safety, infection prevention, patient privacy or operational reasons.

8. Complaints and Feedback Policy

• Patients may submit feedback or complaints at the reception desk or through the hospital's designated feedback channel.

• A complaint should include the date, relevant department and a brief description of the concern. Patients should avoid including unnecessary sensitive information in general feedback forms.

• The hospital's designated team should acknowledge receipt and review the complaint according to its internal process.

• Urgent concerns relating to immediate patient safety should be raised directly with the clinical staff without waiting for the standard complaint process.

9. Document Control

• This sample handbook is a fictional training resource. In a real organization, each policy should have an accountable owner, approval authority, review date and controlled version history.

• Staff should use the latest approved policy version. Superseded copies should be clearly marked and removed from active operational use.
